

**HARRISON WESTERN**

**PROJECT MANAGER:**

About the Company: Harrison Western was founded in 1968 and has provided superior design and construction services to the mining, and tunneling industries for nearly 50 years, as well as providing ground support for civil projects. Additionally, Underground Infrastructure Technologies, LLC (UIT), a division of Harrison Western, is a full service utility contractor specializing in trenchless technologies. UIT performs wet and dry utility installations utilizing both trenchless technologies and open cut excavation to complete projects, large or small in multiple geographic markets. Headquartered in Lakewood, Colorado, we have completed over \$2 billion of mining and construction development projects that range geographically from the Artic to the Andes.

**Key accountabilities of the role include:**

- Provide leadership throughout a project to ensure timely and quality results with responsibilities of safety and cost performance
- Lead project estimate review and hand-off, start-up, monthly interim, and close-out meetings
- Facilitate collaborative team processes among project participants including architects, owners, and subcontractors
- Review project plans for constructability and cost feasibility; assist with project risk assessments and prepare scope of work matrices
- Analyze and manage project progress, costs, budgets, and cash flows

**Requirements:**

- Bachelor's degree in Construction Management or Engineering and at least 7 years of related experience running construction projects
- Proficiency with scheduling, spreadsheets (Excel, Word), cost control, and project management software. Microsoft Project or other construction programs preferred
- Solid understanding of value engineering, life cycle costing, and project profit/cost processes
- Ability to travel to project work sites
- Valid driver's license with a clean driving record
- Experience in driving accountability for financial and operational effectiveness, integrating and aligning efforts within teams, monitoring results, and tackling problems directly
- Ability to work within a complex business as an active participant in driving safety, quality, schedule and cost performance, demonstrated effectiveness in driving operations and executing plans
- Developed written, oral, and listening skills in order to effectively communicate with diverse audiences
- Ability to efficiently manage multiple projects and priorities simultaneously under time constraints
- Background and drug screening
